**Sage Oil Vac** has been manufacturing on-site oil change equipment since 1993. During the last 7 years, we have expanded our product lines to include the oil & gas industry, construction industry and military. Our newest product targets the fast-growing wind power industry.

**Sage Oil Vac** has developed a trailer-mounted mobile oil change system that can be operated from the ground. **Sage Oil Vac** systems use a patented vacuum system to evacuate oil. A fluid pump is used to deliver fresh oil to the gear box. The enclosed system eliminates heavy lifting of buckets and reduces mess and spills.

## Standard Features all systems:

- 300 ft (91.44 m) dual hose on hand crank reel
- Heated Fresh Fluid Tank
- Barrel Straw to vacuum fresh gear oil into system
- On board 3 micron filtration system
- Secondary containment to hold 110% of single tank

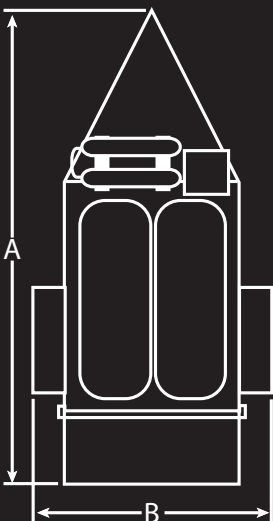

### Additional benefits include:

All trailer systems meet the National Association of Trailer Manufacturers guidelines and are U.S. DOT street legal. All tanks are ASME rated pressure vessels.

Vacuum fresh gear oil in the system

- 1 Tongue mounted toolbox
- 2 Used oil tank
- 3 Fluid level gauge
- 4 Vacuum in new oil
- 5 New oil tank
- 6 3 micron filtration unit
- 7 300 ft. dual hose reel
- 8 Used oil offload
- 9 Secondary containment pan

The Sage Oil Vac system can deliver ISO 320 Viscosity Grade Gear Oil at a rate of 4-6 gallons (15-22 liters) per minute \*

The Sage Oil Vac system can vacuum Gear Oil Directly from the tower Gearbox at a rate of 1-2 gallons (4-8) liters per minute. \*

\*actual delivery and suction times depend on temperature and other viscosity factors.

Patent Numbers: 5884676 - 5476154
