SAGE OIL VAC COLOR PROCESS & PRICING

Sage Oil Vac Paint Process

Pressure wash frames with a degreaser to remove mill oil. Blast fabricated frames with Garnett, to prep the surface for paint.

Paint system, PPG Industrial Urethane DTM paint AUE 370 paint at 4 -6 dry mils. Note: PPG Defleet used for lube bodies.

Sage Oil Vac Paint Pricing

Sage Oil Vac standard colors for trailers, skids, and carts are Oil Vac Yellow tanks and Oil Vac Gray unit frames.

Other colors chosen on the color chart are a \$289 / unit upcharge.

When choosing a color scheme other than the standard color described above, customer can choose to have entire unit painted the selected color, or may choose all components to have the selected color and the frame to remain Oil Vac Gray.

Two tone coloring - if 2 colors are chosen from the color palette above, other than Oil Vac Yellow and Oil Vac Gray, to create a Two Tone effect, a \$289 will be charged for each color.

Sage Oil Vac standard color for truck bodies is Oil Vac white.

Customers may elect to provide desired color requirements outside of the Color Palette contained here. When doing so, a one time color match fee of \$395 is required. This fee is a one time administration fee to match color. Subsequent orders are not subject to this color match fee.
