

SAGE OIL VAC STREAMLINES MANUFACTURING WITH THE INTEGRATION OF AMARILLO TANKS

Recent acquisition of Willborn Tank and Manufacturing allows company to control more of the manufacturing process.

Amarillo, TX — December 21, 2022: Sage Oil Vac ramps up its production of mobile lube equipment with the integration of storage tanks designed and built by Amarillo Tanks. In the spring of 2021, Sage Oil Vac acquired the Willborn Tank and Manufacturing line of fuel storage tank line. Since then, the company has established a new company, Amarillo Tanks, to support its mobile lube equipment business and provide onsite storage tanks for a variety of materials and applications.

According to Aaron Sage, CEO of Sage Oil Vac, the integration of the product line acquired from Willborn Tanks and Manufacturing allows Sage Oil Vac to have more direction over the manufacturing process. “This acquisition gives us control over the quality and design of the workhorse of the Sage Oil Vac product offering. We also gain efficiencies, which is important when much of the market is facing supply chain issues. This investment helps us meet the demands of our customers' current and future needs.”

Headquartered in Amarillo, Texas, near the Sage Oil Vac manufacturing facility, Amarillo Tanks are now being used on the majority of Sage Oil Vac's mobile lube equipment makes and models. In addition, Amarillo Tanks continues to be a leading provider of stand-alone fuel and oil tanks, fuel trailers, irrigation valve box enclosures, fuel fill-spill containment units, water catchment systems and livestock/wildlife tanks. Amarillo Tanks' round and rectangular tanks meet UL 142 Aboveground Flammable Liquid code requirements. The company has the ability to produce double-walled tanks for specialty applications.

“The sky is the limit with this acquisition, and I am confident Amarillo Tanks will take our capabilities to the next level with ample tank supply resources for Sage and endless customization opportunities for our customers,” Aaron said.

Amarillo Tanks also absorbed former Willborn Manufacturing team members into its fold to retain top talent, ensure a smooth operational transition and minimize acquisition stress.
