

UPFIT

THE EASIEST WAY TO GET THE EXACT SERVICE VEHICLE YOU NEED? **BUILD IT WITH US.**

For more than 30 years, Sage Oil Vac has been helping crews maximize uptime with pump-free fluid exchange systems. But that's just the beginning of what we can do. We're upfitting experts, able to design and install complete work vehicle solutions — **including lube, fuel, DEF, crane and storage options** — tailored to your operation. The end result: safe, durable and efficient builds for maximum productivity.

WHY CHOOSE SAGE OIL VAC

YOU NEED A TRULY CUSTOM SOLUTION.

We're known for our pump-free equipment, but we offer so much more than fuel and lube solutions. With us, you're never limited to prefit models offered by big-name competitors. We'll help you create the exact work vehicle you need, leveraging smart partnerships to build a completely tailored solution.

YOU WANT TO BE A PRIORITY.

You have direct access to company management and ownership. And you're always welcome to visit us on-site to meet with the project manager and engineering teams.

YOU CARE ABOUT CRAFTSMANSHIP.

A lot of companies offer upfitting. Few have spent the time we have refining a finished product and digging into quality engineering processes. We've been innovating in the fuel and lube system space for 30+ years — and we're bringing those skills to your build.

A FEW THINGS WE CAN DO

TURNKEY LUBE VEHICLE INTEGRATION

Customize a lube truck package with tanks, pumps, metering, filtration, DEF and spill containment. Every design is fully engineered, compliant with industry standards and engineered for functionality.

CRANE BODIES AND HEAVY EQUIPMENT MOUNTING

Add new capabilities to your work vehicle. We offer crane installation with PTO integration, outriggers, and load-rated hydraulic and electrical systems.

SERVICE BODIES, FLATBEDS AND GOOSENECKS

Level up your work with mechanic bodies and flatbeds designed for durability, payload and jobsite efficiency.

VAN INTERIORS AND UPFITS

Make the most of your space with drawer systems, shelving, lighting, anchoring, on-board power and mobile-workshop interiors built around your workflow.

POWER, AIR AND WELDING SYSTEMS

Create reliable on-site performance with compressors, welders and all-in-one power units.

SAFETY, ACCESSORIES AND LIFTGATES

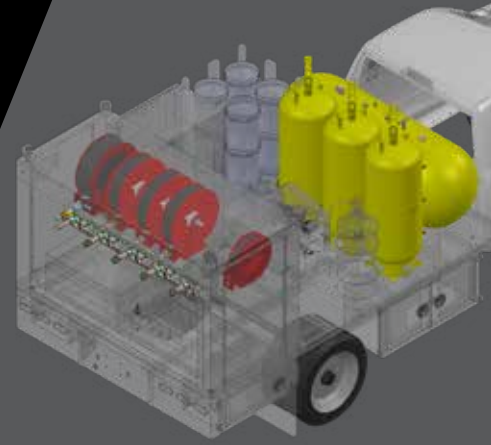

Build a safer workflow with lighting, cameras, warning systems, liftgates, and DOT- and OSHA-compliant safety solutions.

CUSTOMIZATION CAPABILITIES

From day one, we partner with you to ensure your work vehicle fits your needs, while meeting safety requirements. We use:

- SOLIDWORKS Pro to create 2D and 3D CAD mockups for approval.
- Premium load software to evaluate weight distribution and center of gravity for safety.
- Fleet standardization programs and VIN-specific builds to create repeatability.

PROVEN STEP-BY-STEP PROCESS

WE'RE HERE TO BUILD EXACTLY WHAT YOU NEED. HERE'S HOW WE DO IT IN FIVE EASY STEPS.

1. Discovery:

We work together to understand your requirements and budget, covering all the possibilities for custom body/crane builds, fuel and lube needs, storage and more.

2. Design:

Our engineering team works out the setup, creating layouts and selecting components. We'll then generate a quote with the expected investment.

3. Approval:

You'll review the design and quote before final sign-off. Our team will be there to make adjustments if needed.

4. Fabrication and installation:

Our dedicated upfitting team gets to work on your vehicle, bringing your design to life.

5. Commissioning:

From final testing to operator training, our team tackles the final details to make sure your vehicle is ready to roll.

AFTER THE BUILD

We're here to help your business run smoothly, even after your vehicle heads to its final destination. You can rely on us for:

- A standard workmanship warranty and manufacturer-backed equipment warranties.
- Preventive maintenance plans, field service and parts support.
- Streamlined turnaround options and loaner solutions for critical fleet downtime.
